SUMMARY

An Informatics student with a practical foundation in IT support from an internship at UDINUS and a deep specialization in web development. Committed to building user centric web solutions while expanding knowledge in mobile and machine learning domains. A highly adaptable team member who thrives on collaborative problem solving and rapidly acquiring new technical skills to deliver high quality project outcomes.

EDUCATION

S1 Teknik Informatika - Universitas Dian Nuswantoro - IPK 3.52 - Semarang **2022 - Present**
SMAN 1 Ambarawa - Ambarawa **2019 - 2022**

WORK EXPERIENCE

IT Support Intern Computer Laboratory - Universitas Dian Nuswantoro **Oct 2024 - Present**

- Performing laboratory PC maintenance (including software/hardware troubleshooting, component replacement, and updates).
- Providing direct technical support to students facing hardware or software issues.
- Managing laboratory administration, such as creating monthly lab condition reports, and conducting routine checks on computers (PCs) and networks to ensure everything functions properly.

Freelance Photographer **2021 - 2024**

- Frequently contributed to photography documentation for various official institutional events (including within government/military scopes) to support journalistic coverage needs.
- Some projects handled include documentation for the "Salatiga Navy Event 2023," "Kasal Cup Salatiga 2023," "Tenis Meja Prabowo Cup Semarang 2024," and various smaller events.

OTHER EXPERIENCE

Head of Public Relations - Dinus Open-source Community (DOSCOM) **July 2024 - Present**

- Managing internal member development and various technical training activities, as well as fostering collaboration with external parties. The organization consists of 60 board members and 30 active members.
- Responsible for branding strategy and establishing a positive organizational image in the media to enhance visibility.

Lead of Release Party 2024 - Dinus Open-source Community (DOSCOM) **May 2024 - July 2024**

- Successfully led the planning and execution of the national seminar "Release Party 2024: Leveraging Cloud & Linux for DevSolutions." This event focused on the release of TeaLinux OS and cloud computing topics, with an attendance of 215 participants.
- Collaborated technical knowledge with event management skills, resulting in a successful and impactful seminar for the local open-source technology community.

Flutter Mentor for DOSCOM University - Dinus Open-source Community (DOSCOM) **Mar 2024 - Apr 2024**

- Taught the fundamentals of Flutter development to students, focusing on core concepts and simple applications.

Wirausaha Merdeka Precision Technopreneurship - MBKM 2023 **Aug 2023 - Jan 2024**

- Perfected the "Fontainest" Swiftlet Nest F&B product, engaged with investors, and successfully pitched at the Dian Nuswantoro University investor summit stage.
- This was my first experience presenting to investors, which tested my public speaking skills and business idea development.

PROJECTS

Synergazing - Student Collaboration Platform

- Spearheaded the development of Synergazing, a web platform designed as a "marketplace for talent and ideas" to connect university students across Indonesia for collaborative projects.
- My primary role was leading the front-end development using Next.js, React, and TypeScript, building core features such as the project marketplace, a talent discovery gallery, and comprehensive user profiles that serve as dynamic portfolios.

Sistem Informasi Operasional Laboratorium Komputer UDINUS

- Working on SIOPAL (Sistem Informasi Operasional Laboratorium Komputer), which is currently under continuous development. My primary focus is on optimizing backend services using Laravel Filament and designing and developing the admin panel as the core functionality of the system. This admin panel includes crucial features such as management of PTPP correspondence workflows, laboratory inventory, general laboratory information, and employee data.
- Also responsible for creating system design documentation, including UML diagrams (Use Case, Class Diagram, Activity Diagram, Sequence Diagram) to ensure structured development.

Website Company Profile & CMS untuk Bran Apparel (IG: @branapparell) - branapparel.com

- Developed a company profile website for a custom clothing business using the Laravel framework.
- Implemented a Content Management System (CMS) that enables the business owner to independently and easily manage website content. Also performed basic SEO optimization to improve website visibility in search engines.

Development of the syllabus for the "Basic Flutter Workshop DOSCOM University 2024

- The syllabus for this team project covers fundamental topics essential for Flutter development. It starts with Object-Oriented Programming (OOP) with Dart, moves into widgeting concepts, state management, API integration, and finally Firebase usage. The ultimate goal of the workshop is for participants to build a tourist information application.
- I was personally responsible for delivering the material on widgeting concepts and state management during the dedicated weeks for those topics.

SKILLS

- **Programming Languages & Frameworks :** Working mainly using PHP (Laravel, Filament), NextJs, Typescript, Javascript, Flutter, Dart, Python
- **Operating Systems:** Windows, Linux
- **Version Control:** Git
- **Soft Skills & Interpersonal Strengths:** Communication and collaboration skills, enabling me to effectively bridge the gap between technical teams and broader audiences. Ability to foster teamwork and prioritize collective success over individual ambition.
- **Languages:** English (B2 / Upper Intermediate) & Bahasa Indonesia
